ChatCut Claude Code plugin is here

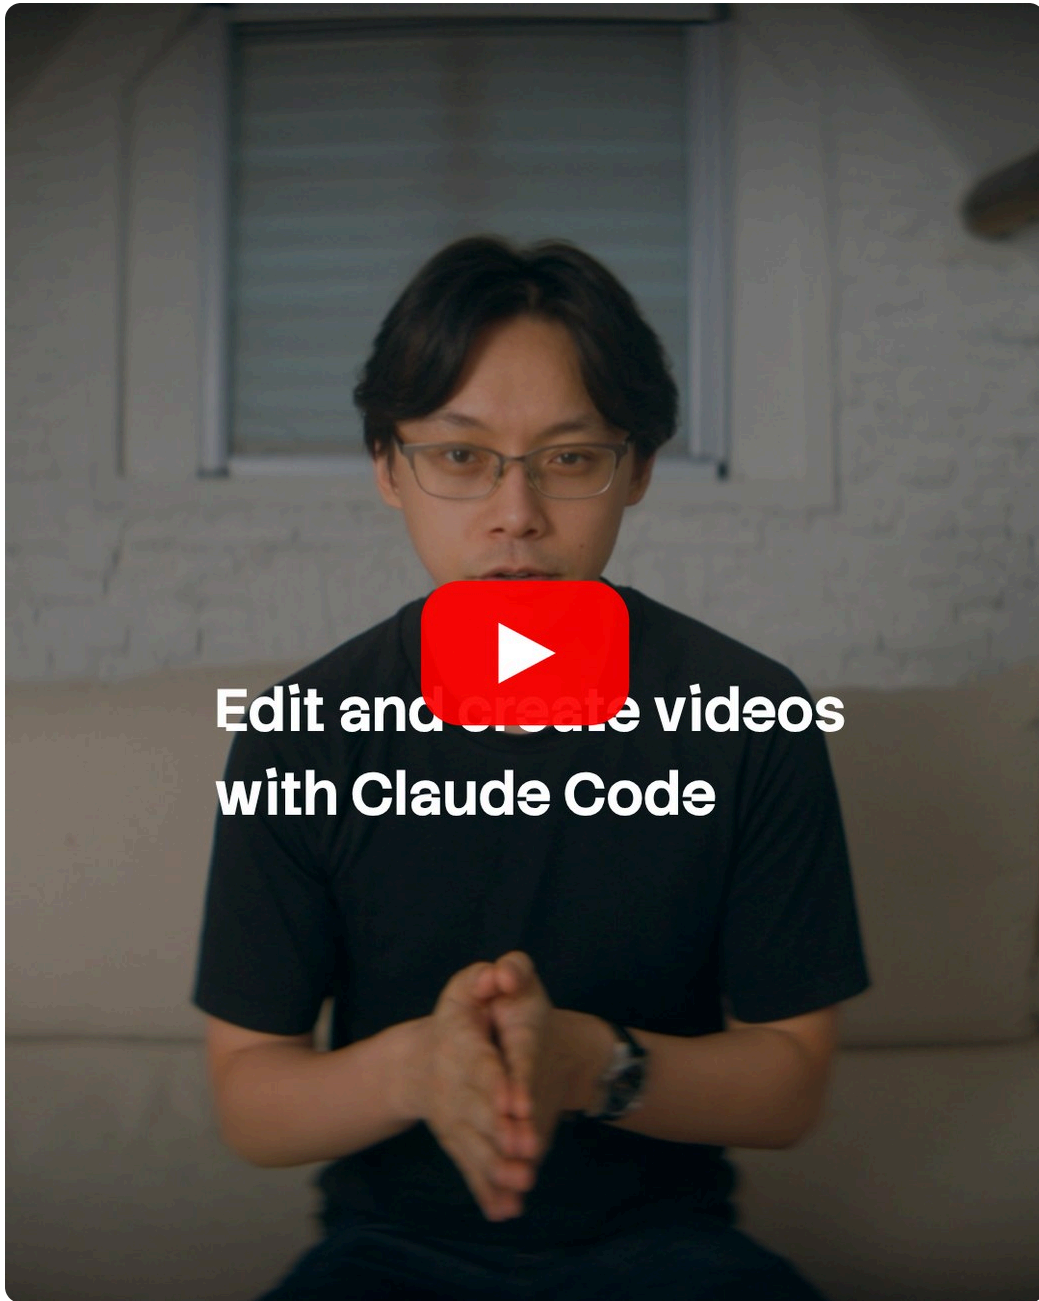

The plugin is out of early access. It's now open to everyone, with the full ChatCut editing experience built in.

A complete editor opens right inside Claude Code, where you and your agent work on the same timeline. Media library, player, motion graphics, captions, and export, all without leaving Claude.

If you're already paying for Claude, you get this one for **FREE**.

Start using it in 1 minute, by entering the prompt below into any Claude Code session:

Read <https://chatcut.io/claude> to install and use the ChatCut plugin

Best,
Team ChatCut
